

Weekly Report

12/08/2024 – 18/08/2024

Group ID: 3
Project Name: Gogle
Prepared by: **Le Duy Anh**

Team members:
22127012 – **Le Duy Anh**
22127083 – **Cao Huu Khuong Duy**
22127219 – **Huynh Cao Tuan Kiet**
22127255 – **Ly Dinh Minh Man**
22127360 – **Vo Nguyen Phuong Quynh**

1. Achievements since last week:

STT	Description	Due Date	Responsibility	%Complete
1	Test UI Flow and Feedback	7/08/2024	All members	100%
2	Improve UI Prototype	11/08/2024	Vo Nguyen Phuong Quynh Huynh Cao Tuan Kiet	100%
3	Generate Test Cases	11/08/2024	Le Duy Anh Ly Dinh Minh Man	100%
4	Update UCSP Document	11/08/2024	Cao Huu Khuong Duy	100%

- a. Test UI Flow and Feedback:**
 - Thoroughly tested the UI flow to identify usability issues and bugs.
 - Gathered feedback from users and stakeholders for improvements.
- b. Improve UI Prototype:**
 - Enhanced the UI prototype based on feedback from testing.
 - Refined design elements and improved user experience.
- c. Generate Test Cases:**
 - Developed comprehensive test cases to cover major features and functionalities.
 - Ensured thorough testing scenarios for reliability.
- d. Update UCSP Document:**
 - Reviewed and updated the Use-Case Specification Document (UCSP).
 - Incorporated recent changes and insights for accurate system behavior description.

2. Issues and impacts:

- a. Test UI Flow and Feedback**
 - Issue:** Identifying and addressing design inconsistencies and usability issues.

- **Impact:** Improved user experience and reduced risk of post-deployment issues.

b. Improve UI Prototype

- **Issue:** Incorporating feedback into the prototype while maintaining design consistency.
- **Impact:** Enhanced usability and user satisfaction with the final product.

c. Generate Test Cases

- **Issue:** Creating test cases to thoroughly test all features and functions.
- **Impact:** Facilitated effective testing, leading to fewer bugs and a more reliable system.

d. Update UCSP Document

- **Issue:** Ensuring the UCSP document accurately reflects recent changes.
- **Impact:** Maintained alignment among team members and stakeholders.

3. Next week goal:

This coming week, we will build upon the progress made this week by focusing on the following key areas:

Architecture and Design

- **Deploy Prototype to Web Frontend:** Deploy the updated UI prototype to the web frontend. Ensure the deployment process is smooth and address any issues.

API Integration and Bug Fixes

- **Verify Account by Email API:** Implement and test the account verification process using the email API. Ensure the process is secure and functions correctly.

Project testing and validation

- **System Test:** Conducted thorough system-wide testing to verify that all components integrated seamlessly. Identified and resolved integration issues.
- **Unit Test:** Performed unit testing on individual components. Achieve high test coverage for the final product.

By successfully completing these tasks, we will advance the project significantly and lay a solid foundation for future development.

STT	Description	Due Date	Responsibility
1	Deploy Prototype to Web Frontend	18/08/2024	Ly Dinh Minh Man Vo Nguyen Phuong Quynh
2	Verify Account by Email API	15/08/2024	Le Duy Anh Huynh Cao Tuan Kiet
3	System Test	18/08/2024	All members (Duy host)
4.	Unit Test	18/08/2024	All members (Duy host)
